COMPANY PROFILE

EPCC Contractor for Heating, Ventilation and Air Conditioning & Refrigeration (HVAC-R) and Fire Protection System for Oil & Gas, Marine, Petrochemical, Commercial & Industrial Building and Laboratory Industry

INTRODUCTION

AGV Offshore Sdn Bhd is an EPCC contracting company specializing in the execution of Heating, ventilation and Air Conditioning & Refrigeration (HVAC-R), Fire Protection System and other Engineering related works on design build basis or customized projects in accordance with customer requirements. AGV Offshore Sdn Bhd was found in 2012, with a combined experience of more than 40 years in the domain of HVAC-R and Fire Protection System serving the oil & gas, marine & petrochemical industries . Since inception, our extensive experience ensures that we provide project solutions with the lowest total lifecycle cost while meeting each customer's specific requirements. Our capabilities include planning, design, engineering, equipment supply, procurement, delivery, installation, testing, commissioning to after sales services and maintenance of the complete Engineering system. Our efforts in providing our expertise are backed by qualified and experienced professional Engineers specializing in their respective fields of Project Management, Production, Erection, Commissioning, Maintenance, After Sales and Services. From the initial design, fabrication, implementation to final commissioning and operation, our highly experienced and responsive Engineering & Project team are hands-on at each stage to ensure the timely completion of our customer's projects. With a customer oriented approach, our team always aims to deliver more than expected and to value-add to our customer's growth and development.

OUR VISION

To be the leader and solution provider in the region providing integrated systems services and design for Engineering, Installation and Maintenance on HVAC-R, Fire Protection System and Other Engineering related works.

OUR MISSION

To provide our customers the highest level of quality products & services at fair and market competitive prices.

To ensure the longevity of our company through repeat and referral business achieved by customer satisfaction in all areas including timeliness, attention to detail and service-minded attitudes.

To maintain the highest levels of professionalism, integrity, honesty and fairness in our relationships with our suppliers, subcontractors, professional associates and customers.

To provide our employees with an honest and helpful working environment, where every employee individually and collectively, can dedicate themselves to providing our customers with exceptional workmanship, extraordinary service, and professional integrity.

Our commitment to this mission will allow AGV to become the premier in Mechanical & Electrical systems and Other Engineering related works globally.

VALUE PROPOSITION

AGV delivers products and services that meet client's unique requirements, by employing individualized and customized product design within a reasonable time and cost limits.

BUSINESS ACTIVITIES

Since inception AGV has been dedicated to provide HVAC-R and Fire Protection System product and services for the following industry sectors:

- Onshore
- Offshore
- Petrochemical
- Marine
- Building Industry
- Laboratories
- Clean Room
- Cold Room
- Analyzer House
- LEV System
- Multi purpose cabin module

CONSULTANCY

SERVICES OVERVIEW

AGV as a consultant provides an expert and professional consultancy services to the field of HVAC-R and Fire Protection System. Our team of engineers and management has wide knowledge of the subject matter thus empowers clients to have access to deeper levels of expertise than would be feasible for them on their own. As services are hired by client, AGV is available from the beginning of project and can suggest all the necessary provisions from the beginning. This will expedite the project execution with minimum rework and hence save the project cost. Our scope of consultancy services for both HVAC-R and Fire Protection System are as follows:

- Feasibility Study
- Conceptual Planning
- Preliminary Design Report and Budget Estimates
- Detailed Planning
- Specifications
- Schedule of Quantities
- Detailed Cost Estimates
- Notice Inviting Tender
- Comparative Statement for Tenders- Commercial & Technical Contract Agreements

DESIGN & DEVELOPMENT

HVAC-R

AGV offers design solutions for air conditioning systems that are duly compliant with ASHRAE and AHRI standards. The main purposes of a Heating, Ventilation, and Air-Conditioning & Refrigeration (HVAC-R) system are to help maintain good indoor air quality through adequate ventilation with filtration and provide thermal comfort. HVAC-R systems are among the largest energy consumers in any building. The choice and design of the HVAC-R system can also affect many other high performance goals, including water consumption (water cooled air conditioning equipment) and acoustics. Thus at AGV we design customized HVAC-R systems to meet customers' expectations without compromising on quality and standards.

Activities:

- Calculation of building thermal loads with Carrier E20 Hourly Analysis Program
- Sizing or Design of HVAC-R System
- Efficient and cost effective Air Distribution System
- Details working of equipment location, system Capacity, piping, ducting and etc.
- Working out detail calculation for Electrical and Water requirement (chilled water system).
- Giving necessary provision to architect for Piping and Ducting sizes and it's routing.
- Making specifications for various Equipment & Material along with tentative layout drawings.
- Selection of system concepts and establishment of building and electrical interfaces. i.e F&G signals, ESD, DCS.

ELECTRICAL WORKS

We design electrical systems using the latest technologies considering specific project requirements along with compliance of all relevant International codes. We take into account fundamental principles of energy conservation and safety that encompass protection against electric shocks, thermal effects, over current, fault current and over voltage. All these potential hazards are addressed at the time of design, resulting in an installation that is essentially free from hazards, convenient in operation and adequate for a long trouble-free service.

Activities :

- Cable tray /ladder/trunking Layout design & routing
- Cable Pulling & termination works
- Electrical Design
 - Motor Control Center Panel (Form 1 to Form 4)
 - Control Panel – Hard Wire (Form 1 to Form 4)
 - Control Panel – Programable Logic Control (PLC)

FIRE PROTECTION SYSTEM

We design Fire Protection system based on NFPA Standard, LPC Standard, BSC Standard, ULC and FM according to project requirements along with compliance of all relevant International codes. We take into account fundamental principles of safety that encompass protection against High proficiency & efficiency in design, engineering & implementation of complex fire protection solutions with latest system design & engineering software programs/applications. Wide experience and technical know-how on all types of active fire protection systems and facilities within the guidelines of the Uniformed Building By-laws (UBBL), Malaysian Fire & Rescue Dept. (Bomba) and industry-based regulations, as well as international fire protection standards and guidelines.

Activities :

- Fire safety audit and hazard-&-needs analysis
- Giving necessary provision to architect for Piping sizes and it's routing.
- Making specifications for various Equipment & Material along with tentative layout drawings.
- Details working of equipment location, system Capacity, piping and etc.
- Working out detail calculation for fire suppression system.
- Fire alarm panel design

PROCUREMENT, FABRICATION & INSTALLATION

Apart from designing we have our dedicated project team whom are very experienced in site works in environments like, marine/ offshore, onshore, petrochemical & building industries. Our project team would be executing design starting from construction phase and take full charge installation of equipment's. This would enable our client to rest assured that mismatching of design to actual construction. Our project teams liaises with the engineering department closely and report any variation from initial design enabling our engineers to work on the as built drawings early on rather than waiting till the whole construction has finished.

Activities:

- Assist in procurement of all equipment and machinery for project execution
- Factory inspections
- Site inspections
- Administration and coordination of the works during the construction stage
- Periodical visits to the site of works during execution to ensure that the intent of the drawings in properly carried out and that technical features envisaged by the Engineers are properly executed
- QA/QC Inspection

TESTING AND COMMISSIONING

HVAC - R & Fire Protection System

- Installation check & functional test
- Start Up, Pre Commissioning and Commissioning
- Vibration test of equipment
- Noise level test
- Electrical Insulation Testing
- Termination check
- Cause & effect check on PLC system
- Continuity Test
- Smoke & Heat test
